

Course Project Schedule, Reporting, and Grading

1 General

You are supposed to hand in a final report:

- The **final report** is due on *Sunday, 13th of December at 23:59*. The final report with all figures and references must not exceed **6 pages**. Note that this is a hard limit, and larger reports will be penalized.

Presentations will take place on *Tuesday 15th of December and Wednesday 16th of December*, according to the distributed schedule. Your presentation should last 15 minutes and will be followed by 10 minutes question & answer session. The deadline for handing in the **slides in PPT(X) or PDF format** is the night before your presentation, i.e., *Monday, 14th of December or Tuesday, 15th of December at 18:00*. We will bring a laptop with the slides of all groups to the presentations. If you want to show movies (e.g., of your simulations), bring a USB key with you. You will be assigned to review a report of one group doing the same project as you and ask questions after their presentation, therefore you must be present for the presentations of other groups doing the same project as you. Attending the presentations of other projects is not mandatory.

2 Format of the Reports

Please use one of the following templates:

<http://ras.papercept.net/conferences/support/tex.php> (ieeconf.zip, for Latex)

<http://ras.papercept.net/conferences/support/word.php> (ieeconf_A4.dot, for MS Word)

and hand in the report in PDF format. These are the templates for IEEE Transactions publications.

Your final report should be in 2-column format and include the following sections:

- *Abstract*: short, but concise description of your project and results
- *Introduction*: brief description of your project and why it is interesting (with citations)
- *Experiments*: what you did in your project
- *Results*: what you discovered (you may want to include tables or plots here)
- *Conclusion*: summary and implications of your findings
- *References*: relevant past work

3 Grading

The final grade for your course project will be based on the following criteria:

Team work	10%
Initiative, commitment, autonomy, rigorousness	20 %
Actual work performed and achievement of goals	20 %
Final report	25 %
Final presentation	25 %
