Lab 4 Outline

- Concepts:
 - Fast Fourier Transforms (FFT)
 - Frequency Response (Bode Plots)
 - Filtering
- Tools:
 - Matlab

Review – Frequency Response

- **Frequency response:** Quantitative measure of output spectrum of a system in response to stimulus (usually sine waves)
- **Magnitude** and **phase** of the output as a function of frequency
- For **linear systems**, if a **sine wave** injected to system at a **given frequency**, it responds at the **same frequency** with a **certain magnitude and phase**.

Review – Frequency Response

This shows only magnitude response, phase might also be affected

Review - Bode Plots

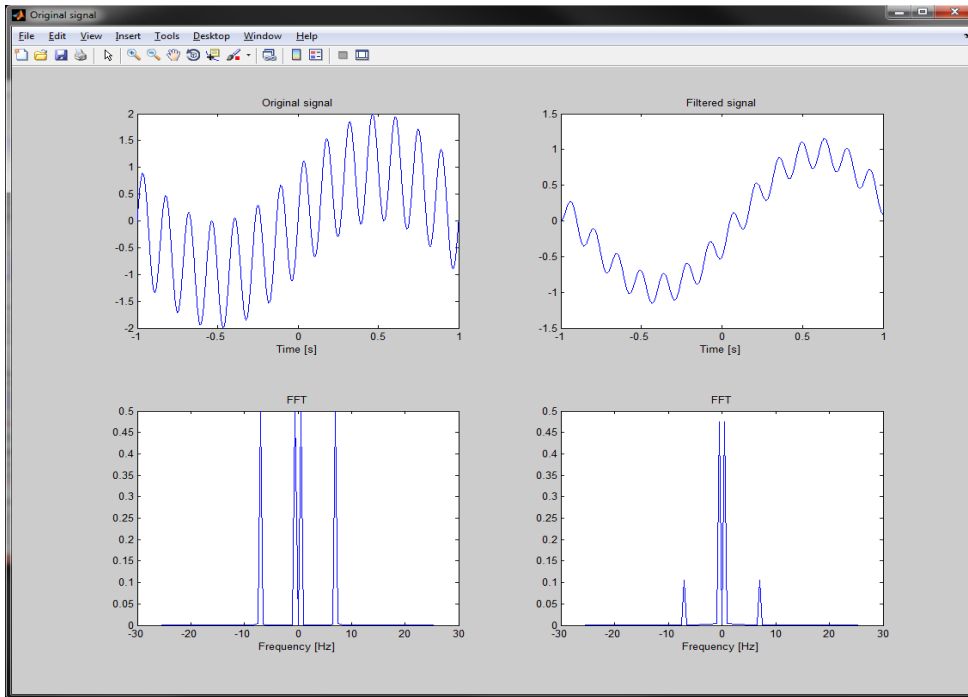

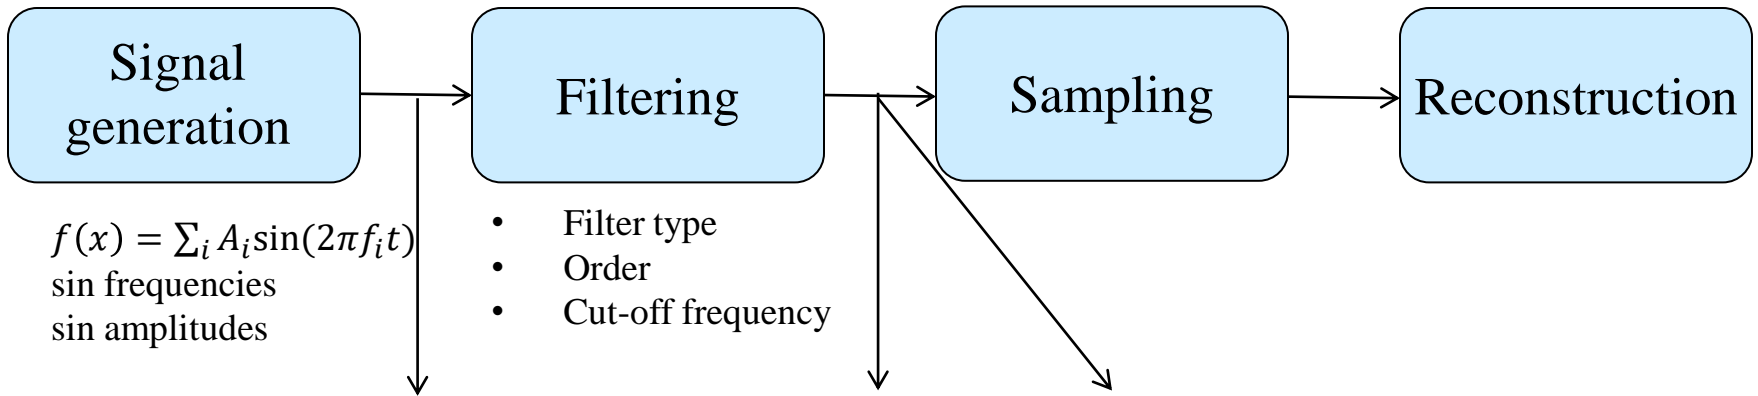

Part 1: Filters

- $f(t) = \sum_i A_i \sin(2\pi f_i t)$
- sin frequencies
- sin amplitudes

- Filter type
- Order
- Cut-off frequency

Part 2: Sound / Voice Signal & Filters
